

Updating Kodi 17.x to Kodi 17.3

1. Click on **Add-ons** then down to **Install from Zip**
2. Click on **Chrismerica** then on **plugin.program.chrismerica-3.1.zip**
3. Wait for Chrismerica Wizard Updated notification to popup.
4. If you get a Chrismerica Wizard popup with a bunch of selections, then click **continue**. Another popup will follow asking if you want to go to Build menu, select **Ignore**.
5. Now go to **Add-ons** then down to **Program Add-ons** and click on

Chrismerica Wizard

6. Go to **APK installer** and then click on **Kodi 17.3** and install. Once it is finished installing click **Open**.
7. Now go back to **Add-ons** then **Program Add-ons**, click on **Chrismerica**

Wizard

Chrismerica Wizard

8. Click on **Builds Menu** and select either the 17.3 Chrismerica Regular or Adult Build and do **Fresh Install**.
9. Once it is done you will get a popup, click on **Force Close**
10. Relaunch Kodi and enjoy.
